

Stop copy-pasting between your apps.

Custom AI automations that connect your tools and do the repetitive admin for you.

[Book your workflow audit](#)

What gets automated

Lead capture

WhatsApp, Instagram or website enquiries → CRM or Google Sheet automatically.

Inbox triage

Emails and messages turned into structured tasks and follow-ups.

Reports

AI-generated summaries and recurring reports sent on schedule.

Internal tools

Simple AI agents for your team's repetitive questions and data entry.

Why you need this

- ✓ Hours lost each week manually moving data between spreadsheets, email and chat.
- ✓ Errors from copy-paste and missed follow-ups that cost you deals.
- ✓ No coding needed on your side — I build it, you use it.

Packages

Basic

R1,250

One workflow mapped, built, and documented.

Standard

R2,500

Up to 3 workflows with common integrations like

Premium

R5,000

End-to-end automation package with n8n setup,

Gmail, Google Sheets,
WhatsApp/Telegram, or
Airtable.

revisions, and 30-day
support.

How it works

1. **Tell me the task** — describe the repetitive admin you want gone.
2. **I build the flow** — in n8n or your preferred no-code stack.
3. **I hand it over** — with documentation and a video walkthrough.

Typical use cases

- ✓ Website or WhatsApp leads pushed straight into a CRM or Google Sheet.
- ✓ Inbox triage that turns emails into clean tasks, follow-ups, or summaries.
- ✓ Recurring management reports generated and sent automatically.
- ✓ Property, admin, or sales workflows that stop living in someone's head.

What you get

- ✓ A working automation built in n8n or the agreed no-code stack.
- ✓ Clear documentation of the flow and required credentials.
- ✓ A handover video or walkthrough so the system is not a black box.
- ✓ Practical advice on what should be automated next.

What I need from you

A clear description of the task, and access to the accounts involved (Gmail, WhatsApp/Telegram, Google Sheets, Airtable, etc.). That's it.

FAQ

Do I need technical skills?

No. The automation runs itself; you just use it.

What tools do you use?

n8n as the core, plus Make and Google Apps Script depending on your stack.

Will it work with my Gmail and Sheets?

Those are the most common integrations — almost always yes.

How fast can you deliver?

Simple jobs can usually be turned around in a few days. The actual timing depends on how messy the workflow and access setup are.

Built by a South African software engineer automating admin for entrepreneurs, property investors and small businesses.
